

Hello

My name is Luz Delos Santos and I'm an immigrant. I hope that all people in power can help us find a solution to the immigration injustice that we are facing. Most immigrants contribute to the economy of this country; we work hard to feed and support our families and pay our taxes despite not getting any benefits from the government. Most of us are decent individuals looking for a better life for us and our families and deporting us makes it hard for us to support ourselves or our families. There's too much poverty in my country, Dominican Republic and knowing that people will starve if you send them back should be a reason to stop deportations, especially those of us who have been here for many, many years and deem USA as our home. Please help stop all deportations, especially for those that qualify under DAPA and DACA. SUPPORT HB 7039, please!

Luz Delos Santos
